3. Who does what

When	What	Who
This week	Give every action in the tracker a named owner	Owner
This month	Act on the high-priority actions and record progress in the tracker	Action owners
This month	Fix the data issues listed in the readiness note	Data owner
Next quarter	Rerun on the new period and compare	Analyst

4. How the files work together

- Each owner updates their line in the **action tracker**. In the dashboard, choose *Load the updated file* and pick it to see what is still open; the file stays on your computer.
- The **dashboard** tries a new branch or a price change with your own numbers before anyone commits money.
- The **presentation** has speaker notes on every slide, and its charts can be edited in PowerPoint.
- The **workbook** recalculates: choose a branch in the yellow cell of the Control panel.
- Editing the Excel and PowerPoint files needs Office, or a free tool such as Google Sheets and Slides. Reading them does not: both are inside `00_START_HERE`.

5. What we need for the next run

The same exports for the new period (or the live connection), the action tracker with its updates, and any change in sites, prices or accounts.

6. Data and access

All client data will be deleted within 10 business days of the end of the engagement (or retained for the next run as agreed).
